

Huachuca Water Company Dam in Miller Canyon.

Top photo is a different copy of the bottom photo, as it shows the ridgeline. Photo is from 1880-1900, by C. S. Fly, captioned as "sluiceway in the Huachucas." Center photos are from lower in canyon, but show ridgeline; cannot see ridgeline from dam site today, there are too many trees in the way. The black lines are same in each photo, showing how they compare.

Comparison by Leonard Taylor
